# Contents

Preface	vii
<b>1 Background</b>	<b>1</b>
<b>2 Propositional Logic</b>	<b>8</b>
2.1 Introduction	8
2.2 Propositional Logic — Syntax	9
2.3 Propositional Logic — Semantics	12
2.4 Boolean Valuations	14
2.5 The Replacement Theorem	17
2.6 Uniform Notation	20
2.7 König's Lemma	23
2.8 Normal Forms	24
2.9 Normal Form Implementations	31
<b>3 Semantic Tableaux and Resolution</b>	<b>36</b>
3.1 Propositional Semantic Tableaux	36
3.2 Propositional Tableaux Implementations	41
3.3 Propositional Resolution	45
3.4 Soundness	49
3.5 Hintikka's Lemma	51
3.6 The Model Existence Theorem	52
3.7 Tableau and Resolution Completeness	57
3.8 Completeness With Restrictions	61
3.9 Propositional Consequence	66
<b>4 Other Propositional Proof Procedures</b>	<b>70</b>
4.1 Hilbert Systems	70
4.2 Natural Deduction	77
4.3 The Sequent Calculus	82
4.4 The Davis-Putnam Procedure	88
4.5 Computational Complexity	93

<b>5</b>	<b>First-Order Logic</b>	<b>97</b>
5.1	First-Order Logic – Syntax . . . . .	97
5.2	Substitutions . . . . .	100
5.3	First-Order Semantics . . . . .	104
5.4	First-Order Uniform Notation . . . . .	110
5.5	Hintikka’s Lemma . . . . .	112
5.6	Parameters . . . . .	114
5.7	The Model Existence Theorem . . . . .	114
5.8	Applications . . . . .	117
5.9	Logical Consequence . . . . .	119
5.10	Craig’s Interpolation Lemma . . . . .	121
5.11	Beth’s Definability Theorem . . . . .	123
<b>6</b>	<b>First-Order Proof Procedures</b>	<b>126</b>
6.1	First-Order Semantic Tableaux . . . . .	126
6.2	First-Order Resolution . . . . .	129
6.3	Soundness . . . . .	130
6.4	Completeness . . . . .	131
6.5	Hilbert Systems . . . . .	133
6.6	Natural Deduction and Gentzen Sequents . . . . .	136
<b>7</b>	<b>Implementing Tableaux and Resolution</b>	<b>139</b>
7.1	What Next . . . . .	139
7.2	Unification . . . . .	139
7.3	Unification Implemented . . . . .	147
7.4	Free Variable Semantic Tableaux . . . . .	152
7.5	A Tableau Implementation . . . . .	155
7.6	Free Variable Resolution . . . . .	169
7.7	Soundness . . . . .	173
7.8	Free Variable Tableau Completeness . . . . .	175
7.9	Free Variable Resolution Completeness . . . . .	180
7.10	The Replacement Theorem . . . . .	185
7.11	Skolemization . . . . .	187
7.12	Prenex Form . . . . .	190
<b>8</b>	<b>Equality</b>	<b>194</b>
8.1	Introduction . . . . .	194
8.2	Syntax and Semantics . . . . .	195
8.3	The Equality Axioms . . . . .	198
8.4	Hintikka’s Lemma . . . . .	200
8.5	The Model Existence Theorem . . . . .	205
8.6	Consequences . . . . .	206
8.7	Tableau and Resolution Systems . . . . .	208
8.8	Alternate Tableaux and Resolution Systems . . . . .	214
8.9	A Free Variable Tableau System With Equality . . . . .	218

8.10 A Tableaux Implementation With Equality . . . . . 224  
8.11 Paramodulation . . . . . 231
